- Software Engineering student and aspiring Data Engineer passionate about building technology solutions that solve real-world problems.
- Skilled in Python, JavaScript, SQL, Django, Flutter, Machine Learning, Data Analysis, and Product Development.
- Experienced in developing web applications, mobile applications, machine learning systems, and collaborative technology solutions.
- Driven by a long-term mission to use data and technology to improve education, workforce development, and economic opportunities across Africa.

To become a Data Engineer and technology leader who develops scalable data systems that improve education, workforce development, and economic opportunities across Africa through innovative, data-driven solutions.

WORK EXPERIENCE

Skye8 Technologies

06/2023 - 08/2025

Mobile Application Development Intern

Cameroon

- Developed cross-platform mobile applications using Flutter and Dart.
- Built reusable UI components and responsive application interfaces.
- Applied Git and GitHub for collaborative software development.
- Collaborated with mentors on mobile architecture and deployment practices.

Software Development Intern (Frontend Development)

Cameroon

- Developed interactive web interfaces using HTML, CSS, and JavaScript.
- Participated in collaborative software development projects.
- Strengthened communication and presentation skills through technical pitch sessions.
- Applied problem-solving techniques to real-world development challenges.

Software Development Intern (Frontend Foundations)

Cameroon

- Learned modern web development principles and best practices.
- Built responsive web pages using HTML and CSS.
- Collaborated with developers and mentors in an industry-focused environment.
- Developed foundational software engineering and UI development skills.

EDUCATION

Bachelor of Engineering in Software Engineering

College of Technology, University of Bamenda

Bamenda, Cameroon • 01/2023 - 01/2026

- Software Engineering
- Database Systems
- Data Structures & Algorithms
- Web Development
- Mobile Application Development
- Artificial Intelligence
- Systems Analysis & Design

PROJECTS

AI-Powered Employment Matching Platform (Team Innovation Project)

- Collaborated on the design of a technology-driven employment platform addressing youth unemployment and workforce skill gaps.
- Conducted research on workforce development trends and labor market challenges.
- Contributed to user journey mapping, pain point analysis, and product planning.
- Supported prototype development and solution validation using Figma.
- Presented solution concepts through stakeholder pitches and product demonstrations.

AI-Powered Healthcare Consultation System

- Built a healthcare consultation platform using Django and Machine Learning.
- Implemented Random Forest algorithms for disease prediction.
- Generated personalized healthcare recommendations based on user symptoms.
- Designed backend architecture and database integration.

Automated Forex Trading Bot

- Developed an algorithmic trading system capable of executing automated trades.
- Implemented EMA, RSI, MACD, and ADX trading strategies.
- Designed ATR-based risk management and dynamic position sizing.
- Built optimization and backtesting functionality.

Weather Forecast Application

- Developed a weather forecasting application using external APIs.
- Implemented real-time weather data retrieval and visualization.
- Built location-based forecasting features and user-friendly interfaces.

SKILLS

Programming: Dart, JavaScript, Python, SQL

Frameworks & Technologies: Django, Flutter, Git, GitHub, Machine Learning, MetaTrader 5, REST APIs

Data & Analytics: Data Analysis, Data Cleaning, Data Visualization, NumPy, Pandas, SQL Databases

Professional Skills: Communication, Presentation Skills, Problem Solving, Product Development, Project Planning, Research, Stakeholder Engagement, Team Collaboration
